

Justin Goncalves

Information Security Engineer | Cloud, Identity, and Network Security

Enterprise Security | IAM | Threat Detection | Vulnerability Management

857-407-9412 | justingoncalves34@gmail.com | [GitHub Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Information security engineer with experience implementing and supporting security controls across hybrid infrastructure, identity platforms, endpoint environments, and enterprise systems. Brings working depth across security operations, risk management, identity and access administration, threat detection, and cloud security platforms. Bridges security operations and infrastructure engineering, enabling organizations to improve visibility, strengthen access controls, and maintain secure enterprise environments.

CORE COMPETENCIES

Cloud Security | Identity & Access Engineering | Vulnerability Management | Security Auditing |
Threat Detection | Incident Response | Endpoint Security | Network Security |
Infrastructure Security | Access Governance | Microsoft Security

TECHNICAL SKILLS

Cloud Security	Azure Defender for Cloud Intune Purview Wiz Hybrid Infrastructure
Identity Security	Okta Entra ID Active Directory MFA RBAC SSO Least Privilege GPOs
Threat Detection And Response	Sentinel Defender Splunk Enterprise CrowdStrike Falcon SentinelOne XDR Tines SOAR KQL
Network Security	Sonicwall Aruba Wireshark TCPDump DNS DHCP VPNs Firewalls ACLs
Vulnerability Management	Qualys Rapid7 Patch Management Remediation Risk Scoring & Assessment Cyber Asset Management Vulnerability Scanning
Frameworks	HIPAA NIST CSF & SP 800 53 PCI DSS OWASP Top 10 MITRE ATT&CK Zero Trust
Tools/Platforms	ConnectWise N-Able ServiceNow Jira ITGlue
Scripting	Python Bash Powershell SQL

PROFESSIONAL EXPERIENCE

Information Security Engineer (Cloud and Network Security)

Jan 2025 - Present

Sorbis Technology | New York City, NY

- Supports security operations across 125+ client environments spanning 950+ servers and 1,100+ endpoints, administering cloud, identity, endpoint, and network security technologies that support daily business operations across hospitality and professional services organizations.
- Led security audits across 10+ hybrid client environments, evaluating identity, infrastructure, network, and cloud security controls to identify gaps, develop remediation recommendations, and strengthen security standards.
- Served as a first responder for multiple credential compromise and endpoint security incidents while participating in a 24/7 on-call rotation, leading containment and remediation efforts that restore secure access and minimize business disruption.
- Led vulnerability remediation and patch management initiatives across more than 300 workstations and servers spanning 20+ client organizations, addressing known security findings and improving patch compliance while maintaining vendor-supported systems.
- Implemented IAM controls across Entra ID, Active Directory, and Microsoft 365 environments, including Conditional Access policies, MFA requirements, and identity governance practices that standardize authentication controls, strengthen account security, and support Microsoft Secure Score improvements.

- Manages Aruba and Juniper network infrastructure supporting hundreds of connected devices, performing VLAN segmentation, port security configuration, and access control management that maintains secure and reliable network operations.

Security Engineer (Infrastructure and Application Security)

Dec 2023 - Jan 2025

Digit Web Solutions | Cheyenne, WY

- Led infrastructure and security administration for 30+ client web environments and 20+ recurring hosting accounts, managing domains, DNS records, SSL/TLS certificates, email systems, and hosting platforms that supported business-critical applications and online services.
- Implemented identity and access management controls across client environments, including MFA deployment, account administration, privileged access management, and security awareness training that improved account security and reduced common user-driven security risks.
- Designed and maintained backup, recovery, and business continuity processes for websites, databases, and hosting environments, supporting service availability and recovery from operational disruptions.
- Developed automation and infrastructure modernization initiatives utilizing APIs, workflow automation, and process standardization, reducing manual administration requirements and improving operational scalability across client environments.

Web Developer & IT Consultant

Apr 2020 - Dec 2023

Independent Consultant | Boston, MA

- Developed and maintained custom websites and web applications for over 50 clients, managing web hosting, database integrations, API connections, and application deployments.
- Implemented SSL/TLS certificates, user authentication controls, access restrictions, and hosting security configurations to protect client applications and data.
- Worked directly with business owners to gather requirements, troubleshoot technical issues, recommend technology solutions, and deliver projects aligned with operational goals.

PROJECTS

Virtual Security Operations Center (Microsoft Sentinel and Azure)

- Developed hands-on experience with SIEM administration, threat detection, KQL query development, alert tuning, and incident investigation by building a Microsoft Sentinel security operations center that ingested over 7.6 million security events and generated 5,900+ security alerts.

Enterprise Security Architecture Project

- Expanded knowledge of security architecture, threat intelligence integration, identity monitoring, and SOAR automation through the redesign of security operations workflows for an enterprise hospitality organization utilizing Microsoft Sentinel, Microsoft Defender, Entra ID, Recorded Future, and Tines, culminating in a one-hour stakeholder presentation and live automation demonstration.

EDUCATION AND CERTIFICATIONS

SANS Technology Institute

Cyber Immersion Academy

University of Massachusetts, Dartmouth

Business Administration Coursework

Certifications: **CompTIA:** Security+, Network+ | **GIAC:** Foundational Cybersecurity Technologies (GFACT), (GSEC In Progress) | **ISC2:** Certified in Cybersecurity (CC) | **Microsoft:** SC-900: Security, Compliance, and Identity, SC-300: Identity and Access Administrator, AZ-104: Azure Administrator, AZ-900: Azure Fundamentals, AB-730: AI Business Professional | **Qualys:** Vulnerability Management, Detection and Response (VMDR), CyberSecurity Asset Management (CSAM), Vulnerability Management Scanning (VMS)
