EXECUTIVE SUMMARY:

Cybersecurity and IT professional with experience in vulnerability management, incident response, SIEM monitoring, and security operations across enterprise environments. Proven success protecting infrastructure, supporting security operations, and delivering secure, scalable solutions. Recently accepted into the SANS Technology Institute Cyber Immersion Academy to further advance technical and cybersecurity expertise.

CERTIFICATIONS:

- **GIAC Foundational Cybersecurity Technologies (GFACT)**, (2025)
- **CompTIA: Security+ CE**, (2024) and **CompTIA Network+**, (2025)
- **Microsoft: AZ-900: Azure Fundamentals**, (2025) and **AZ-104: Azure Administrator Associate**, (2026)
- **ISC2 Certified in Cybersecurity (CC)**, (2024)
- **Google Cybersecurity Professional**, (2024)
- **Qualys Certified Specialist Certifications**, (2024)
 - Vulnerability Management Detection and Response (VMDR), CyberSecurity Asset Management (CSAM), Vulnerability Management Scanning (VMS)
- **U.S. Department of Homeland Security National Incident Management System (NIMS)**, (2024)
 - IS-100.C, IS-200.C, IS-700.B, IS-800.D, IS-230.E, IS-860.C, IS-906, IS-915, IS-916, IS-1300, IS-2500

EDUCATION & TRAINING:

SANS Technology Institute, Cyber Immersion Academy

(2025 - 2026)

- Selected for a prestigious and intensive cybersecurity program with courses designed to provide hands-on experience in offensive and defensive security techniques.
- Anticipated completion of industry-leading certifications such as GIAC Security Foundations (**GFACT**), GIAC Security Essentials (**GSEC**), and GIAC Certified Incident Handler (**GCIH**).

University of Massachusetts Dartmouth, North Dartmouth, MA

(2019 - 2023)

- Concentration in Finance and Financial Operations
 - Umass Dartmouth Economics Club (2022)
 - Umass Dartmouth Cyber Security Education Club (CSEC), (2022)

SKILLS:

Tools: Splunk, Qualys, Microsoft 365, Microsoft Azure, Microsoft Sentinel, Microsoft Defender, SentinelOne, Entra ID, Wireshark, Microsoft Active Directory, TCPDump, Burp Suite, Metasploit, N-Able RMM, Tines SOAR, Google Cloud Platform (GCP)

Frameworks: NIST CSF (SP 800-53, 800-61, 800-171), OWASP Top 10, CIS Controls, PCI DSS, HIPAA, GDPR, DHS NIMS, SOC 1/SOC 2, ISO/IEC 27001, MITRE ATT&CK

Core Competencies: Security Architecture & Engineering, Incident Detection & Response, Threat Intelligence, Risk Assessment, Vulnerability Management, Network Security Engineering, Identity & Access Management (IAM)

Security Operations: SIEM Monitoring, SOAR Workflows, Security Monitoring, Log Analysis, IDS/IPS, Incident Detection/Response

Programming/Scripting: Python, SQL, Linux, Bash/Shell Scripting, HTML/CSS, Powershell, Kusto Query Language (KQL)

WORK EXPERIENCE:

Network Engineer

January 2025 - Present

Sorbis, Hybrid, Full-Time, (24/7, 365 Rotations)

- Provided Tier 2–3 support for Windows-based enterprise environments, resolving escalated incidents related to endpoints, servers, IoT devices, and network infrastructure, using ConnectWise to triage, prioritize, and document technical resolutions.
- Utilized Remote Monitoring and Management (RMM) and Security Information and Event Management (SIEM) platforms to monitor, investigate, and respond to alerts across thousands of endpoints spanning 125+ client environments.
- Supported security operations through endpoint monitoring, log analysis, incident triage, vulnerability remediation, patch management, endpoint protection, multi-factor authentication, and least-privilege access control enforcement across client environments.
- Assisted with the deployment, configuration, and troubleshooting of secure network infrastructure, including firewalls, VPNs, switches, routers, and Windows-based servers.
- Managed Microsoft Active Directory, DNS, DHCP, GPOs, and access control lists (ACLs) across many multi-site environments.
- Maintained accurate documentation of system changes, hardware inventory, and troubleshooting procedures to ensure audit readiness.
- Participated in on-call rotation to provide after-hours support, ensuring client systems remained operational and secure.

Operations Manager & IT Systems Administrator **Digit Web Solutions, Remote/WFH, Full-Time**

December 2023 - January 2025

- Managed web hosting services for 30+ clients, ensuring optimal website performance, uptime, security, and seamless functionality through DNS, SSL certificates, and email configurations.
- Led a talented team of Software Engineers, Web Developers, Data Analysts, and Graphic Designers to deliver high-quality projects on time and within budget.
- Oversaw and led the deployment of web development projects, software solutions, business automations, and internal IT infrastructure, ensuring scalability, security, and efficiency.
- Designed and implemented scalable IT infrastructure, including network systems and cloud-based solutions, while establishing robust data backup and disaster recovery plans.
- Conducted IT risk assessments, implemented security controls, and trained team members and clients on cybersecurity best practices to safeguard sensitive information and digital assets.

Freelance Web Developer

April 2021 - December 2023

Independent Contracting, Remote/WFH

- Collaborated with clients to gather requirements, define project scope, and deliver tailored web solutions. Designed, developed, and deployed responsive, user-friendly websites tailored to client requirements, managing client domain registration and hosting services.
- Integrated various third-party tools and APIs to implement custom website features, analyze performance and metrics, optimize functionality, and deliver a seamless user experience.
- Specialized in identifying and troubleshooting technical issues while implementing robust solutions to maintain website functionality, enhance security, and ensure reliability.
- Created comprehensive documentation for website updates and trained clients on content management systems, ensuring long-term usability and operational independence.

LABS, PROJECTS, AND PROGRAMS:

Recorded Future Cyber Threat Intelligence Project

- Designed a threat intelligence and security operations architecture for a simulated multi-site hospitality organization utilizing **Microsoft Sentinel**, **Microsoft Defender**, **Entra ID**, and **Recorded Future** integrations.
- Developed **SIEM** and **SOAR**-driven threat detection and response workflows focused on phishing, identity compromise, suspicious authentication activity, and malicious indicators of compromise, including automated alert enrichment and response actions using Tines.
- Authored technical documentation for stakeholders, including a written report and technical presentation, featuring security architecture diagrams outlining data flows, detection logic, and incident response procedures.

Virtual SOC Environment Project

- Established a cloud-based Security Operations Center (SOC) using **Microsoft Azure and Sentinel**, delivering real-time threat detection and incident response capabilities for 2 Virtual Windows Servers.
- Monitored **7.6 million security events** and implemented custom KQL alert rules to enhance detection and resolution efficiency.
- Conducted threat intelligence analysis, refining incident response strategies and identifying attack vectors for improved monitoring.

AIG Cybersecurity Engineering Program

- Served as an Information Security Analyst on the AIG Information Security Team, conducting research and infrastructure analysis to draft a detailed remediation plan for impacted teams.
- Crafted an advisory email to notify the Product Development team of the vulnerability, risks, impacts, and actionable remediation steps.
- Developed and executed a **Python**-based brute-force script to decrypt a ransomware-encrypted file during a simulated attack, showcasing technical proficiency in incident response and encryption methodologies.

Telstra Cybersecurity SOC Experience Program

- Led Telstra's Security Operations Center (SOC) Team as a Cybersecurity Analyst and Engineer.
- Managed the Incident Response Lifecycle, triaging malware attacks and documenting procedures for strategic improvement.
- Engineered and implemented a custom **Python** firewall rule to block traffic exploiting the **Spring4Shell** vulnerability (CVE-2022-22965), bolstering defenses.
- Collaborated with SOC teams to develop actionable insights for enhanced incident response planning.

Commonwealth Bank Intro to Cybersecurity Program

- Served as a Cybersecurity Generalist on the Commonwealth Bank Fraud Detection and Response team.
- Analyzed and visualized data using **Splunk** to identify fraud patterns and enhance incident detection monitoring.
- Managed simulated phishing and malware attacks using the Incident Response Lifecycle and developed security awareness training aligned with **ACSC** best practices.
- Conducted penetration testing on web applications, identifying critical vulnerabilities and recommending remediation strategies.

PwC Switzerland Cybersecurity Program

- Worked as a Cybersecurity Analyst and Consultant on PwC Switzerland's Digital Intelligence Team.
- Conducted risk assessments, uncovering critical vulnerabilities and recommending mitigation strategies aligned with frameworks like **NIST CSF** and **ISO-27001**.
- Authored detailed security reports, outlining solutions such as network segmentation and enhanced security architectures.
- Provided tailored recommendations to improve clients' compliance posture and risk management frameworks.
